---

## Projects (code for these and more can be found at <https://github.com/WilsonCN14>)

### Python Black Box Game (August 2020)

- Black box board game coded in python where the player must guess the locations of atoms in a box by shooting rays into the box and seeing if the rays go straight through or deflect from an atom.

### Gardening Website (December 2020)

- Fully coded a four-page website using HTML/CSS/JavaScript. Website includes a picture carousel.

### ChrisTy's Gameshop (March 2021)

- Worked with team to code toy video game store that includes a MySQL database.

### Clock API (August 2021)

- API coded in Python Flask that tells the time in various time zones at a specified time later.

---
